## Summary

I'm the API Developer for Sikka Software Corp, a software developer focused on interface for the data driven industry. In this role I lead the API team. Our most exciting work to date was creating Sikka API v2 that generated enormous partners and was key to the successful launch of the SIKKA ECOSYSTEM. Not only did we have fun creating the API, but also we found it rewarding to see the results.

Before joining Sikka Software, I worked for one software firm — VRAJ SOFTCARES[, and was lucky enough to work with amazing colleagues and clients.

I'm truly passionate about my work and always eager to improve existing API. While I enjoy all aspects of my job, I think my favorite stage of a project is working with the client or partner's IT leader to understand his or her business objectives. As we go through that collaborative process, the ideas start to flow and that's always the fun part.

I have a MCA from Veer Narmad South Gujarat University, Surat and a BCA from the Gujarat University, Ahmedabad.

I'm always interested in hearing from former colleagues, managers, or just interesting creative folk, so feel free to contact me if you'd like to connect.

### Summary:

- SaaS Architecture Analysis and Design
  - Technical requirement Analysis and Implementation
  - Contributing in application development
